### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 20 February 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Response to Arguments***

Applicant's arguments filed February 20, 2003 have been fully considered but they are not persuasive. The applicant argues that the references do not show enclosure walls defining a body. The Examiner disagrees. Schairbaum discloses a CRT which is a body enclosed by walls. Lechman has side walls 20, 22 a bottom 28 a front 18 a top 12 and a back 53.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 27 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. No wheels are disclosed and shown by the drawings.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 17, 22 and 23 are rejected and claims 25 and 26 are objected to under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and

Art Unit: 3637

distinctly claim the subject matter which applicant regards as the invention. Claims 17, 22 and 23 are misdescriptive because claim 15 defines the display as disposed within the volume defined by the body, thus the display cannot also be mounted to the desk top. The term "wiring" should be -- writing -- in claims 25 and 26 .

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-23, as presented, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Schairbaum. Schairbaum is cited showing a body, the CRT and a supporting frame 11-19, 30-63 including legs 11-15 supporting a desk top 21. The CRT houses elements of a computer including a display and is positioned for viewing through the transparent desk top. A keyboard can be on the desk top and the desk top is adjustable mounted to the CRT.

***Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Art Unit: 3637

Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 24-26, as presented, are rejected under 35 U.S.C. 103(a) as being unpatentable over Schairbaum as applied to claims above, and further in view of Lechman. Schairbaum fails to show a display parallel to the desk top. Lechman is cited showing a display 60 in a desk body 10 having a desk top 14 with a transparent region 62 mounted parallel to a display for the purpose viewing through the desk top. Since the references are from the same field of endeavor the purpose of Lechman would have been obvious in the pertinent art of Schairbaum at the time of the invention it would have been obvious for one having an ordinary skill in the art to have modified Schairbaum with a desk top 14 with a transparent region 62 mounted parallel to a display for the purpose viewing through the desk top in view of Lechman.

***Allowable Subject Matter***

Claims 1-14 are allowed.

This action is NOT final.
